

**Protect Your Peepers**

Serengei glasses are synonymous with superior clarity. Featuring a feather-light rimless design, Serengei Erice glasses are ideal on the road or at the course. The amber lens tint shows golfers the break of the green in high definition. These shades are ready for your 36-hole battle and are comfortable with a hat, visor, or your hair in the wind. **If The Shoe Fits**

Adidas Tour360 Prime Boost is the first men's performance golf shoe to utilize Primeknit technology, which is used in some of its best performing and most recognizable footwear, including the Ultra Boost and NMD. Engineered for comfort, breathability, and overall performance this knit material is certainly a unique look for golf footwear. There's also 50/50 Protect for water resistance in the lower half of the shoe. Adidas says the full-length Boost™ in the forefoot and heel provide energized cushioning and comfort; a lighter and more flexible 360WRAP saddle allows for greater adjustability and adaptability. The new S-curve heel shape, which follows the natural contour of the foot, makes the Tour360 Prime Boost an eye-catcher on the links. [www.adidasgolf.com](http://www.adidasgolf.com) \$229.00

**Get A Grip**

Last summer when Bryson DeChambeau captured the US Amateur at Olympia Fields, his clubs were fitted with Jumbo Max golf grips. These puppies are not just designed for people with larger hands, but for all golfers including women and juniors. Think about it—when you use a hammer or a screwdriver you don't want a small handle, you want something that's more comfortable in your hands and can give you more control. It's the same simple principal when it comes to golf clubs, and you eliminate having to put on multiple wraps of tape to build up your grip. The company has also introduced a couple of different oversized putter grips at a nice price. By the way, DeChambeau continues to play the grips now that he is a rookie on the PGA Tour. [www.jumbomax.com](http://www.jumbomax.com) \$10.99 - 14.99

**Nothing But Net**

Slam Dunk Golf's Hot Shot Putting is just what golf needs to grow the game. Those future hoop stars can pair Stephen Curry's two favorite sports. Whether on the putting green, in the office, or at home, this game will have you trying to slash the net while improving your putting stroke. Simply line up your shot, stroke the ball, and wait for the results. There are hundreds of possible games, but even good old-fashioned HORSE takes on a new spin with Hot Shot Putting. You can even video your trick shots and upload them on Slam Dunk Golf's website. [www.slamdunkgolf.com](http://www.slamdunkgolf.com) \$24.99

**Toulon Designed Putters**

Former TaylorMade Golf executive Sean Toulon has started up a new high-end putter company that stresses a see and feel premise. The company started out with twenty-five different prototypes with different shapes, materials, and face mill patterns in an effort to understand the relationship between sound and feel. In the end, they have created a unique Deep Diamond Mill face pattern milled from a solid block of soft 303 stainless steel that effectively channels the vibration of impact away from your ears to produce a slightly softer, yet still crisp, solid sound and incredible feel. There are five models to choose from named after various cities in the US: Madison (the Wisconsin capital is Toulon's hometown), San Diego, Rochester, Memphis, and San Francisco. [www.toulondesign.com](http://www.toulondesign.com) \$399 - 500

**Performance Shades**

Bolle's Tempest is an athletic, performance-driven style that features Modulator V3 golf lenses that adjust the tint according to the brightness of your playing conditions. Our favorite feature is the large area of coverage that protects your eyes from the sun, the wind, and bunker sand. This is the perfect pair of glasses to combat seasonal allergies. [www.bolle.com](http://www.bolle.com) \$169.99

**Push, Don't Pull**

Doctors agree that it is better that you push your clubs than pull them and stress your back. Big Max Golf has introduced The AutoFold FF featuring a unique folding mechanism that allows all three wheels to open and fold automatically with a simple hand movement. This eliminates the need to secure small moving parts seen on traditional pushcarts. New fold-flat technology makes the cart easy to store and transport, leaving plenty of room for clubs and gear in the trunk of any car, locker, or garage. The durable frame holds all sizes of golf bags while carefully positioned storage compartments fit multiple accessories. Big Max, the No. 1 golf trolley brand in Europe and global pioneer of the three-wheeled pushcart, received *Golf Digest's* Editor's Choice Award for Best Push Cart in 2016. Try an AutoFold FF, your back, and your doctor, will thank you. [us.bigmaxgolf.com](http://us.bigmaxgolf.com) \$269.99
