Chalk One Up for Mom

Founded in 1972 in Sonoma, Chalk Hill was an early leader in planting its hillside vineyards "vertically," following the rise of the terrain. Because of this, the topsoil must be protected with a diverse cover crop which protects the soil; prevents erosion; captures nitrogen; and harbors beneficial insects. Water is conserved through a precisely-controlled drip-irrigation system. The juice for this Sauvignon Blanc was fermented for seven months in a combination of oak and stainless steel. The nose is quite delicate, with just a hint of flowers and vegetation. Then, it bursts on the palate, with plenty of lemon, grapefruit, and mango, plus a rich, full mouthfeel. www.chalkhill.com
